Report Period: 2025-12-31 — 2026-03-31

Generated: 2026-03-31 08:17 UTC

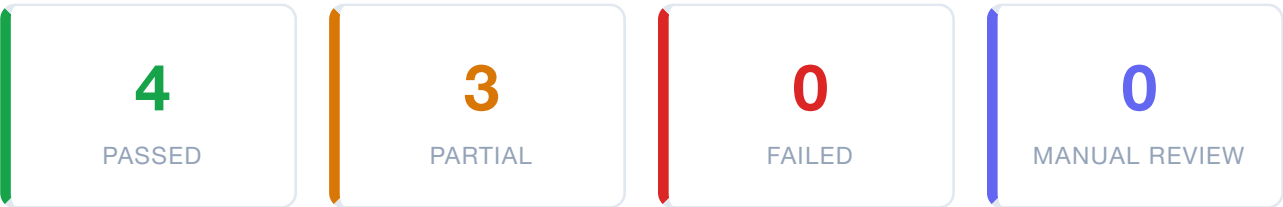

Scope: Software Development Lifecycle & Control Plane

Automated Controls Passing

Executive Summary

This report assesses the compliance posture of **Task Tracker** (ChristianJensen) against SOC 2 Trust Service Criteria and ISO 27001:2022 Annex A controls. It is generated from automated evidence collection and is intended for internal readiness assessment, customer due diligence, and pre-audit preparation.

Controls Assessment

Each control is mapped to both SOC 2 Trust Service Criteria and ISO 27001:2022 Annex A where applicable.

Change Management

CC8.1 Authorization and management of system changes

PARTIAL

Changes to infrastructure and software are authorized, designed, developed, configured, documented, tested, approved, and implemented.

ISO 27001: A.8.32, A.8.25

Check	Status	Evidence
Main branch has protection rules requiring PR reviews	✗	No branch protection found on main
CI/CD workflow definitions present	✓	Found: validate-contracts.yml, dispatch-agents.yml, handle-telemetry.yml, cloud-agent.yml, status-page.yml (+1 more)
Recent merged PRs have at least one approval	✗	No recent merged PRs found
Completed tasks link back to feature specs via queue	✗	No tasks found in queue

CC5.1 Work is planned and tracked before execution

PARTIAL

The entity selects and develops control activities that contribute to the mitigation of risks to the achievement of objectives. Work is authorized via feature specs before task execution begins.

ISO 27001: A.8.25

Check	Status	Evidence
Feature specs exist in features/ before tasks are queued	✓	14 feature spec(s) found with linked tasks
Tasks have assignment tracking (claimed-by and claimed-at)	✗	No tasks found

CC8.1-REVIEW Peer review of changes before deployment

PARTIAL

Changes are reviewed by someone other than the author before being merged to production branches.

ISO 27001: A.8.25, A.8.28

Check	Status	Evidence
Recent merged PRs have review comments or approvals	✗	No recent merged PRs found
Git provides immutable audit trail (author, timestamp, message)	✓	50 commits in last 90 days by 2 authors

Secure Development

A.8.25 Secure development life cycle

PASS

Rules for the secure development of software and systems shall be established and applied.

SOC 2: CC8.1

Check	Status	Evidence
SDLC methodology documented in relay.md	✓	Found: relay.md
Testing rules and standards documented	✓	Found: testing.md
API design standards documented	✓	Found: api-design.md

A.8.26 Application security requirements

PASS

Information security requirements shall be identified, specified and approved when developing or acquiring applications.

SOC 2: CC8.1

Check	Status	Evidence
Contract validation runs in CI pipeline	✓	Found: validate-contracts.yml

A.8.28 Secure coding

PASS

Secure coding principles shall be applied to software development.

SOC 2: CC8.1

Check	Status	Evidence
Security coding rules documented (OWASP, input validation, auth)	✓	Found: security.md

A.8.29 Security testing in development and acceptance

PASS

Security testing processes shall be defined and implemented.

SOC 2: CC8.1

Check	Status	Evidence
Testing requirements including security testing documented	✓	Found: testing.md
CI pipelines run automated tests	✓	Found: validate-contracts.yml, dispatch-agents.yml, handle-telemetry.yml, cloud-agent.yml, status-page.yml (+1 more)

Cross-Reference Matrix

Controls that satisfy both frameworks simultaneously.
